10 Why We Win

WHAT IS ZENITH?

Zenith is an AI-powered opportunity platform that helps students discover, evaluate, prioritize, and act on scholarships, internships, grants, competitions, certifications, and career programmes in one place.

Instead of showing students a long list of opportunities, Zenith explains which options fit them best, why they matter, what they are missing, and what action they should take next.

Zenith | Byte Me

01 PROBLEM STATEMENT

01

SCATTERED OPPORTUNITIES

Students search across websites, emails, social media, university channels, and word-of-mouth just to find scholarships, internships, grants, competitions, and programmes.

02

NO PERSONAL PRIORITY

A long list of opportunities does not tell students which one fits their course, year, skills, goals, CGPA range, readiness, and available time.

03

MISSED DEADLINES & WEAK EXECUTION

High-value opportunities are missed because students do not manage deadlines, documents, preparation tasks, and application progress in one connected system.

02 USER PAIN

Students are not short of opportunities — they are short of clarity, prioritization, and execution. Even when good opportunities exist, many students still do not know what fits them best, what they are missing, or what to do next.

03 OUR INNOVATIVE SOLUTIONS

AI OPPORTUNITY MATCHING

Zenith matches each student with scholarships, internships, grants, competitions, certifications, and programmes based on profile, goals, skills, readiness, and available time.

DECISION INTELLIGENCE

OpportunIQ ranks opportunities using fit score, urgency score, readiness score, ROI score, estimated value, and strategic value to show what deserves attention first.

ACTION SYSTEM

Zenith turns recommendations into next steps through the pipeline, readiness tracker, planner, documents, applications, calendar, and AI Advisor.

Top Pick for You

**PETRONAS Digital Innovation Internship 2026**
Internship • On-site
RM 7,000 / month • Kuala Lumpur

Why this is a top match

- Exceptional fit score (92/100) directly aligns with your CS background, Python/ML skills, and primary goal for Industry Experience.
- Outstanding compensation (RM 7,000/month) offers significant economic value and competitive industry exposure for an undergraduate.
- Low urgency (50/100) due to the May 2026 deadline provides ample time to increase your readiness score before applying.

PRODUCT DEMO

BRAND BUILDING

A personalized command center showing top matches, expiring value, readiness, and weekly tasks.

DECISION PIPELINE

Every opportunity is sorted into Apply Now, Prepare Soon, Track Later, or Skip for Now.

OPPORTUNITY MATCHING

Students compare opportunities using fit score, ROI score, eligibility, deadline, and recommended action.

AI ADVISOR

Students ask what to apply for, what they are missing, and how to plan their next steps.

05 KEY FEATURES

Zenith connects opportunity discovery, AI scoring, readiness tracking, and weekly execution into one student-focused platform.

AI MATCHING
MATCHES STUDENTS WITH
THE RIGHT OPPORTUNITIES.

DECISION PIPELINE
PRIORITIZES WHAT TO APPLY
FOR FIRST.

EXECUTION PLANNER
TURNS RECOMMENDATIONS
INTO WEEKLY TASKS.

STAGES**

**5 CORE
SCORES**

HOW IT WORKS

SCORING ENGINE

Calculates fit score from course, year, study level, goals, skills, and interests.

Measures urgency using deadline proximity and application timing.

Checks readiness from required documents, uploaded assets, and missing requirements.

Combines fit, value, effort, urgency, readiness, and strategic value into priority score.

AI EXPLANATION LAYER

Uses GLM / ILMU-compatible AI to explain why an opportunity is recommended.

Provides reasoning bullets, trade-offs, next step, and why-not-now explanation.

Returns confidence score and uncertain fields so users understand AI limitations.

Falls back to deterministic grounded explanations if live AI fails.

07 TECHNICAL ARCHITECTURE

FRONTEND

React Router app with dashboard, opportunities, pipeline, planner, AI advisor, profile, settings, and search pages.

BACKEND API

FastAPI routes support profile, dashboard, opportunities, pipeline, readiness, planner, advisor, documents, and settings.

SERVICE LAYER

CatalogService, ScoringService, GLMService, ScreenService, and JsonStateStore power the product logic.

AI + DATA

GLM / ILMU integration, AI cache, fallback explanations, JSON state, seeded opportunities, and test coverage.

08 IMPACT & SCALABILITY

Zenith can start as a UM student opportunity platform, then scale into a wider university ecosystem for personalized advising, verified opportunities, and readiness insights.

SCALING PATH

Start local. Scale nationally. Grow regionally.

09 BUSINESS POTENTIAL

STUDENT FREEMIUM

Free:

- - Profile-based matching
- - Saved opportunities
- - Basic planner

Premium:

- - AI advisor
- - Advanced readiness insights
- - Application strategy support

B2C ENTRY POINT

UNIVERSITY SAAS

For
universities
:

- - Student readiness dashboard
- - Opportunity distribution
- - Advising workflow support

Value:

- - Scalable career guidance
- - Better student outcomes
- - Data-driven support

MAIN REVENUE PATH

PARTNER ECOSYSTEM

For
providers:

- Verified listings
- Targeted reach
- Better matching

Future:

- Sponsored posts
- Analytics
- Expansion

SCALABLE GROWTH

WHY WE WIN

BUILT PRODUCT

Frontend routes, backend APIs, dashboard, opportunities, pipeline, planner, and AI advisor are already implemented.

AI-NATIVE LOGIC

OpportunIQ combines fit score, ROI score, urgency, readiness, priority scoring, and AI explanations.

RELIABLE SYSTEM

GLM / ILMU integration includes caching, fallback responses, observability, and test coverage.

CLEAR NEXT STEP

Connect all frontend modules to live backend endpoints, add authentication, expand opportunity ingestion, and pilot with UM students.

Zenith
